

Mandar Hirphode

Data Analyst | SQL · Python · Power BI · Tableau · Grafana · GenAI | BFSI & Energy Analytics

Pune, India | +91 9420662327 | mandarhirphode@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 2+ years' experience turning SQL, Python, and Power BI/Grafana dashboards into decisions for 20+ enterprise clients across BFSI, Financial Services, Retail, and Industrial IoT. Cut data error rates from 8% to under 1%, reduced MIS report turnaround from 2 days to same-day through Python + n8n automation, and delivered 10-12% measurable energy savings via regression forecasting (85-93% accuracy). GenAI practitioner (LangChain, RAG, ChromaDB). IIT Guwahati certified; Employee of the Month 2025.

CORE SKILLS

- **SQL & Databases:** CTEs, Window Functions, Joins, Query Optimization · PostgreSQL · MS SQL Server · MySQL · Snowflake · InfluxDB
- **Programming:** Python (Pandas, NumPy, Scikit-learn) · Statistical Analysis · EDA · Regression · Classification · Time-Series Forecasting
- **BI & Visualization:** Power BI (DAX, Semantic Modeling) · Tableau (working knowledge) · Grafana · Looker Studio · Metabase
- **Reporting & Automation:** Advanced Excel (Pivot Tables, VLOOKUP/XLOOKUP, Power Query, Macros) · ETL Pipelines · SSIS · n8n Workflow Automation · REST API Integration · Microsoft Fabric
- **GenAI:** LangChain · RAG · ChromaDB · ChatGrok (Llama 3) · Prompt Engineering
- **Domain:** BFSI · Financial Services (Investments, Mutual Funds, Insurance) · Energy Analytics · IoT/BMS · Retail
- **Tools:** Git/GitHub · Streamlit

PROFESSIONAL EXPERIENCE

Data Analyst — Employee of the Month 2025

Jan 2025 - Present

Full-Time · BFSI · Retail · Industrial IoT · Sole analytics owner across 3 enterprise accounts

- Reduced data error rate from ~8% to under 1% across 3 production databases by architecting a SQL-based KPI validation and governance framework, enabling reliable downstream ML and BI pipelines.
- Cut MIS report delivery time from 2 days to same-day for 20+ enterprise clients by engineering Python + n8n automation pipelines that replaced 5-7 manual daily reports.
- Delivered 10-12% average energy savings across 50+ clients by designing, training, and deploying Python regression forecasting models achieving 85-93% accuracy for IPMVP energy baseline calculations.
- Built and shipped 25+ production Power BI and Grafana dashboards across 15+ BMS utility types, tracking 500+ portal users and driving equipment, UX, and product decisions for enterprise stakeholders.
- Reduced ad-hoc query resolution time by ~35% by standardizing SQL reporting formats, schema documentation, and data dictionaries across all partner organizations.
- Accelerated analytics onboarding for new enterprise clients by building reusable Python pipeline templates and dashboard components, cutting setup time from days to hours.

MIS Executive (Data Analyst - Investments & Insurance)

Jun 2024 - Dec 2024

Full-Time · BFSI · Financial Services · Motilal Oswal Authorised Partner

- Reduced manual MIS reporting effort by 40% for 50+ client accounts by designing Advanced Excel dashboards (Pivot Tables, Power Query, VLOOKUP) tracking portfolios, SIP transactions, and KPIs across equity, mutual fund, and insurance lines.
- Achieved 100% on-time delivery of daily, weekly, and monthly MIS reports to branch management and financial advisors by building a structured reporting calendar and standardized templates.
- Improved client data integrity by 30% by implementing cross-validation and reconciliation checks on investment records across equity, mutual fund, and insurance data.
- Saved 8-10 hours per week of manual effort by automating recurring MIS workflows using Excel Macros and formula-driven templates.
- Enabled data-driven branch strategy by building KPI tracking dashboards for AUM growth, SIP inflows, revenue, and policy renewal rates, adopted by management for weekly performance reviews.

- Reduced advisor data retrieval time from hours to minutes by consolidating multi-product investment data into unified MIS views for 50+ client accounts.

KEY PROJECTS

GenAI LinkedIn Post Generator | LangChain · RAG · ChromaDB · ChatGroq (Llama 3) · Python · Streamlit

Built an end-to-end GenAI application generating personalized LinkedIn posts using Retrieval-Augmented Generation. Ingested reference posts into a ChromaDB vector store; at query time retrieves top-k semantically similar examples as context for Llama 3 via a LangChain prompt chain. Deployed as a Streamlit app for on-brand content generation in seconds.

IPMVP Energy Forecasting System | Python · Scikit-learn · PostgreSQL · InfluxDB

ML-powered energy forecasting system processing daily IoT sensor readings across 50+ enterprise clients. Trained regression models achieving 85-93% accuracy for IPMVP energy baseline prediction, enabling clients to quantify savings and meet compliance targets.

BMS Reporting Automation Platform | Python · n8n · PostgreSQL · REST APIs · GitHub

Zero-touch reporting automation platform replacing 5-7 manual daily reports across 20+ clients. Integrated multi-source data via REST APIs into PostgreSQL with n8n orchestration, reducing turnaround from 2 days to same-day.

Financial MIS Dashboard Suite | Advanced Excel · Power Query · Power BI · DAX

Suite of Excel and Power BI dashboards tracking AUM, SIP inflows, insurance renewals, and client-wise portfolio performance for a financial services firm, enabling real-time visibility across 50+ client accounts.

EDUCATION & CERTIFICATIONS

- Advanced Certification - Full Stack Data Science & AI, E&ICT Academy, IIT Guwahati x AlmaBetter | Dec 2023 - Oct 2024
- B.Tech - Mechanical Engineering, Shivaji University | 2020 - 2023
- Accenture Data Analytics & Visualization Job Simulation (Forage) - Jul 2024
- Snowflake Introductory Course - DataCamp
- Microsoft PL-300 Power BI Data Analyst - In Progress
- Azure DP-900 Data Fundamentals - In Progress

ACHIEVEMENT

- Employee of the Month - Integrated Active Monitoring Pvt. Ltd. - Nov 2025
